	Unit	2014	2015	2016	2017	2018
Water	m³	133,674	127,168	122,507	125,885	130,496

Business-adjusted KPIs

	Unit	2014	2015	2016	2017	2018
Business information	Revenue generating unit	12,513,500	12,732,400	13,035,900	13,371,600	13,667,800
	Revenue (£m)	4,213.9	4,359.6	4,481.5	4,598.5	4,757.6
	Employees (headcount, year end)	13,340	13,452	13,391	12,905	11,916

[1] All emission factors are based on Defra's Greenhouse gas reporting conversion factors. 2018 figures are based on Defra's 2018 conversion factors **(https://www.gov.uk/government/publications/greenhouse-gas-reporting-conversion-factors-2018)**

[2] This intensity metric has been aligned with Liberty Global and therefore report our electricity consumption and also our net emissions per terabyte of data consumed. The figures for 'terabytes (TB) of data usage' are based on estimated internet protocol (IP) based traffic. We plan to collect the actual data going forward. TB of data usage excludes services not offered over IP-based technology and therefore excludes data usage in connection with cable television, digital television, video-on-demand, asymmetric digital subscriber line and time-division multiplexing licensed capacity. Over time, we expect that all of our data usage will migrate to IP-based technology.

[3] Company vehicles includes company owned and leased cars and vans only. Fuel used in private vehicles that is covered by fuel card, cash allowance or reimbursed by the company are included in Scope 3 emissions

[4] Data only accounts for flights booked through our booking portal, approx 90%.

[5] Business land travel includes travel in rental cars, taxis, rail and public transportation. In addition, business land travel also includes travel in employee owned or leased vehicles for business purposes. Rail purchased outside of our central booking system and claimed back through expenses is also included

[6] Data was estimated for one contractor in 2016
In 2017 fuel used for network expansion was included for the first time. This explains the increase in third party fuel consumed between 2016 and 2017. Data was estimated for five of our 27 contractors in 2017. For 2018, third party fuel data has been captured in the following ways:

- Field service and install is based on actual fuel data provided by our 5 partners

- Logistics is based on actual data provided by our single logistics partner

- Network expansion data is based on a new estimation approach which will be used for future years

n/a: We do not have good enough data available

All data in this document covers the period January 1 to December 31 unless otherwise stated.
